

### Product description

Natural Moss® by Panespol is real moss from the forests of Northern Europe, literally bringing nature indoors as part of contemporary habitat design. It's surprisingly quick and easy to fit and no maintenance is required.

From domestic spaces through to professional environments and community facilities, the design of Natural Moss® by Panespol showcases the material's versatile nature and flexibility. Homes, shops, hotels, restaurants, trade fairs... the settings are endless.

**NM-000 Natural, NM-200 Orange, NM-201 Peach, NM-300 Red, NM-301 Pink, NM-400 Bordeaux, NM-401 Fuchsia, NM-402 Erica, NM-500 Aquamare, NM-501 Classic Blue, NM-600 Green, NM-601 Spring Green, NM-602 Old Gren, NM-603 Mint Green, NM-604 Pacific Green, NM-605 Medium Green, NM-700 Aubergine, NM-701 Lavender, NM-900 Black.**

### Product features

- Natural Moss by Panespol is a stabilised natural moss harvested by hand in the forests of Northern Europe.
- The moss is specially treated so it needs no maintenance.
- The natural moss is dyed using completely environmentally friendly food dyes.
- For indoor use only.
- The panels should not be placed in direct sunlight or near a heat source or air conditioning unit.
- The moss should not be watered, as it could lose both its colour and its properties.
- Environmental humidity should be kept above 40% so the moss preserves its properties and stays in perfect condition. If the humidity levels drop and it dries out, no action is needed, the moss will recover its flexibility when humidity levels return to normal.

### Technical features. Maintenance

- Natural Moss by Panespol comes in galvanised steel trays with bolts for fixing to the wall.
- The panels are 0.6mm thick.
- Standard panel measures are 60x40cm. Panels can also be made to measure depending on the characteristics of each project.
- Approximate weight is 2.4 kilos per panel.
- The panel height of around 40mm includes the support frame and the moss.
